PREFACE.

THE extensive cultivation of Sanscrit, during late years in Europe, has occasioned a demand for the Dictionary of that language, published in 1819, greater than was anticipated, and greater than it perhaps deserved. Copies of it are in consequence procurable with difficulty.

It was my intention to have delayed the publication of a second edition, until I was prepared to offer to those engaged in the study, comprehending men of mature intellect, and eminent amongst the most distinguished scholars of the age, a work constructed on an entirely different model, and one better adapted than a mere alphabetical compilation to learned and philosophical research. Other duties and occupations have prevented the accomplishment of this object, beyond the accumulation of materials. In the mean while, years are passing away, and the vain hope of putting forth a perfect performance may prevent the completion of a useful though more humble task. From the frequent applications, also, that have been made to me for copies of the original Dictionary, I am encouraged to conclude, that a more prompt, though less efficient, compilation than that which I yet hope to accomplish, will not be unacceptable.

Notwithstanding these considerations, however, I might still have hesitated to engage in a reprint of the Dictionary upon the original plan, had it not been thought desirable, by the Committee of Public Instruction in Bengal, to provide with as little delay as possible, the assistance it was calculated to afford to the conjoint acquirement of Sanscrit and English in the Native colleges under their superintendence:—such a combination being in their opinion of the first importance in those seminaries where Hindu youths are reared, not only for the diffusion of the English language, but for the communication of an elementary knowledge of Sanscrit to numbers now precluded from an attainment, which is essentially necessary to the Natives themselves, for a critical knowledge of the languages which they speak, and for the correct application of them to written composition. This latter circumstance determined me to publish at once a second edition of the Sanscrit and English Dictionary, with no other alterations than such as were requisite to render it more comprehensive and less bulky, and better suited to general use.

The chief object of the original compilation was to embody, in one digest, the whole mass of indigenous Lexicography. Reference to Native Dictionaries was the most obvious course of proceeding, in collecting for the first time, the vocables of the language, and the disadvantages of the plan were not fully developed until it was too late to apply a remedy.

The great advantage of having in one compilation, the contents of the many Vocabularies and Comments upon them, which are cited in the first edition of the Dictionary, it cannot be requisite to specify. This department of Sanscrit literature, offers no longer any object to excite the curiosity or distract the attention of the student. Whatever the industry of the native Lexicographers has assembled, is within his reach, in a more commodious and accessible form ; with exception of the contents of a few works sometimes quoted, but rarely met with, which it is believed do little more than repeat the labours of their predecessors, such as the *Vaijayanthi*, *Utpalini*, *Sāvat*, *Kesava*, and *Siva Koshas*.

It will also be admitted, that the words extracted from original Vocabularies, explained by various synonymes, and illustrated by appropriate commentaries, rest upon competent authority. It will not be suspected, that they have been inserted on insufficient grounds, or interpreted according to an arbitrary and possibly erroneous apprehension of the purport of the passages in which they occur. In many cases also, the words given in original compilations, are of comparatively unfrequent recurrence, and when met with, it might not be easy to discover their import satisfactorily by the sense of the context. The author of the *Hārāvāli*, a Vocabulary of but small extent, has especially devoted it to terms of this class, and declares his compilation to be the result of twelve years' reading.

As a counterpoise to these recommendations, it is not to be denied, that exclusive dependence upon original Sanscrit Vocabularies is attended with proportionate disadvantages. They omit almost always words of constant and familiar use, and are exceedingly deficient in adjectives, whether simple or compounded. They abound also in denominative terms, especially those belonging to the Hagiography and Mythology of the Hindus.

In the first edition of the Dictionary, an attempt was made to correct the former class of these deficiencies, but not on a sufficiently extensive scale. In the present it has received greater attention ; and it is hoped, that the student who consults its pages, will seldom be disappointed with respect to the most ordinary and useful words.

In connexion with the arrangements in progress, for the compilation of an Etymological Dictionary, I had verbal indices prepared of the following printed books : the *Māgha*, *Kīrtārajuniya*, *Hitopadesa*, *Menu*, *Bhagavat Gīta*, *Gīta Govinda*, *Durgā Pātha*, *Amru Sataka*, *Siddhānta Kaumudī*, part of *Bhatti*, and part of the *Mitāksharā*. The pundits employed have not perhaps been quite as careful as could have been wished, in making their extracts ; but the lists, it is believed, comprise most of the words which the works specified contain, and which when not inserted in the Dictionary were transferred by me to its pages. Besides the additions made from these sources, I had the aid of my friend Babu Rādhakāṇṭha Deb's Sanscrit Dictionary, as far as the word *प्रत्यय*, and I thence obtained several valuable accessions. I derived some aid also from Dr. Carey's Bengalee Dictionary, which is full of Sanscrit vocables. The Pundits of the Sanscrit College of Calcutta furnished me with occasional lists of technical terms relating to the branches of literature which they teach ;

and I was indebted to Mr. JOHN TYTLER for some, and to the Rev. Mr. YATES for many words met with by them in their course of reading. The Dictionary has by these means received very considerable additions, and the number of words, between fifty and sixty thousand, is nearly double the amount of those contained in the first edition. It would not have been difficult to have made the increase still more extensive, but I did not think it necessary to multiply compound terms, the analysis of which was obvious, and whose component members had a place in the columns of the Dictionary.

In order not to swell the publication to an inconvenient size, I have thought it advisable to omit the particular references made in the first edition to the Vocabularies, whence the words were extracted. It appeared to me probable, that my authority might now be suffered to stand in the room of that on which my labours were originally based, and the space appropriated to mere citation might be more beneficially occupied. Besides the saving of space, however, their exclusion gave me the opportunity of improving the arrangement of the interpretation in those cases where the word admitted of a variety of significations. In the former publication, the meanings followed the order of the Vocabularies, beginning with the one most in repute, as the *Amera Kosha* for example, and supplying additional senses from other works, according to their relative estimation. To have pursued a different plan, would have involved an inconvenient repetition of references to the same authority. Its adoption was sometimes productive of a very immethodical juxtaposition of interpretations. In the present edition, this has been in part at least corrected, and the sense that seems most naturally to result from the etymology of the word takes in general precedence of the rest; the others follow according to their more or less direct relation to the original purport, as far as this can be traced, and according to my judgment, which may have sometimes misled me. It is not likely, that where the relation by analogy, comparison, metaphor or convention is faint and fanciful, any classification can be devised, that will admit of no dispute. It is also difficult, if not impossible, to provide in one language an equivalent for every shade of meaning which the terms of another may be made to convey, especially in a language like Sanscrit, in which compound verbs and their derivatives are often used in a vague and arbitrary manner, or even where they may be thought to offer some connexion with their original import, do so in a remote and indeterminate degree. It would be easy to multiply instances of this nature, but the following will be sufficient at present.

The verb *सि* 'to serve,' when combined with the prefix *आ*, most commonly means 'to have recourse to for asylum or support.' This idea, although it may be considered as the basis of the various applications made of the derivatives of the verb, is not always very evident in such phrases as these: *आत्मविराजितः* confiding in the strength of his own arm; *आवासावस्थिता* standing at a window; *आसनावस्थितः* seated on a seat; *मयूरकावधिका मुनेन* by SKANDA riding on the back of a peacock; *वीर्यमुपाश्रित्य* displaying valour; *आमनाश्रित्य* affected by desire; *अज्योत्सवं वचनं* high-spirited speech; *संस्कृतनाश्रित्य* speaking Sanscrit;

[x]

प्रजयायः प्रजयायै वा विषेः a prohibition regarding either a crude noun, or an affix, &c. Now, here, neither sitting, nor standing, nor riding, nor speaking can in any way be regarded as the proper interpretations of प्राप्ति and its derivatives, and it might convey an erroneous idea of their real purport so to render them in a Dictionary, although they may be legitimately expressed in translation by similar equivalents.

The root प्रज् to embrace, or cling to, has प्र prefixed to it in an intensive sense, to signify, to be closely connected with. The derivative प्रसङ्ग has been rendered by Sir Wm. Jones, in his translation of *MENU*, by six different equivalents: *रुचिप्रसादासङ्गः* 'By the attachment of the organs to sensual pleasure;' *नेषेवाधानं प्रसङ्गेन* 'He must not gain wealth by any art that pleases the sense;' *प्रथितप्रसङ्गैर्वापि प्रसङ्गान्न वञ्चयेत्* 'Though permitted to take presents, let him avoid a habit of taking them;' *सूक्ष्मेऽपि प्रसङ्गेऽपि क्षिप्रं रक्षा विधेयः* 'Women must above all be restrained from the smallest illicit gratification;' *रुचिप्रसादासङ्गः* 'By indulging the sensual appetites;' *प्रसङ्गविनिर्हणः* 'To restrain him from a repetition of the offence.'

To these might be added other passages, where different words must be used to express the precise purport of प्रसङ्ग, although in all of them, the notion of connexion of some kind or other, may be more or less distinctly traced. Whoever looks for all such modifications of meaning in a Dictionary will probably be disappointed; and even if it were possible, it would not be advisable to insert them, unless they were exemplified by the passages in which they occur. It does not follow, therefore, that because they are not found, they have been in all cases unadvisedly or ignorantly omitted; and the omission can never cause serious embarrassment to the student, as the context in comparison with the etymological sense sufficiently illustrates the manner in which the latter has been applied.

Being on the eve of quitting India, I cannot now enter at any length into the vindication of the merits or extenuation of the defects of the present work. I am not unaware of the existence of the latter; but I confidently trust, that such as it is, the Dictionary will contribute to the furtherance of the study of Sanscrit, both in this country and in Europe; and in the situation to which it has pleased the University of Oxford to elect me, it will be my wish, as it will be my duty, to offer to the cultivators of the language, other and better assistance.
